Integrity

Our Vision

By providing proficient innovative solutions which are committed to quality, timely completion and customer satisfaction to enhance our customer’s business.
Innvonix Methodology
To implement or develop software, methodology plays a vital role. A software development methodology or system development methodology in software engineering is a framework that is used to structure, plan and control the process of developing an information system. Innvonix provides structure SDLC (Software Development Life Cycle) methodology to meet our customer requirement. By approaching proper SDLC methodology, depending on project requirement, time, its criticality we help our customer to achieve their goals and help their business grow. Every project and every situation is different, so to choose SDLC methodology, our expert team drives our customers through pros and cons of each methodology and we together come to conclusion to choose the best depending on the situation to meet the customer expectation in term of cost, time and deliverables. We always make a practice to follow each step of SDLC which includes.
We use Agile-Scrum methodology for development as it gives the best result when it comes to robust software development. It focuses on the customer needs at the same time providing timely feedback of work done.

**Inputs from Customers, Team, Managers**

**Product Owner**

**Team**

- Team selects starting at top as much as it can commit to deliver by end of sprint

**Product Backlog**

**Sprint Planning Meeting**

**Sprint Backlog**

1. **What did I accomplish Yesterday?**
2. **What will I do today?**
3. **What obstacles are impending my progress?**

**Average 3 weeks Sprint**
- Define
- Design
- Development
- Integrate
- Testing

**Sprint Master**

**15 Minutes Daily Meeting**

**Sprint Review**

**Deliverables**

**Sprint Retrospective**

**Works Deliverable**

Mobile Application Development

This rapid proliferation of mobile technology allows for faster, cost-effective, enhanced-capability devices along with a growing eco-system which often overwhelms decision makers in taking the right steps to leverage this technology to drive their business results. As mobile adoption grows, the business imperative for mobile business is clear.

Android Development
- Android Phone
- Tablet
- Wearable device

iOS Development
- iPhone
- iPad
- Apple Watch
- Apple TV
We at Innvonix, are representing a team of senior technical developers who are ready to work on complex requirement like yours where a bespoke solution is desired. Our focus is not just on building customized solutions for your requirement, but we make sure that your business needs are fulfilled and processes are simplified. Transparency, Agility and Top notch quality of work can be expected from us. We have catered global clientele learning the traits of the different business worlds. Size of the organization does not matter when you are into a niche segment and need solution out of the box. We are always ready to extend the support for such needs. Feel free to reach us to discuss your solution.
Our Engagement
We at Innvonix understand that no two requirements are same, so it is unfair to use the same pricing model for all projects. Pricing plays a vital role in finalizing service providers and we constantly try to improvise on our pricing models to provide our prospective clients with affordable services without compromising on the quality.

Being into the service industry, where the cost of any software application is directly related to the time and resources invested into it, we constantly look out for innovative ways to achieve desired output in the least possible time to provide affordable pricing structure to our clients. Our transparent pricing mechanisms will ensure that there are no hidden costs later on.
